

Corporate Workshops

Expressive arts programs to nurture and challenge your employees

About Corporate Workshops

There is no denying the incredible impact of healthy, happy and motivated employees and executives on company success. PeaceLove Studios provides an opportunity for companies to invest in their employees wellbeing by providing an experience that is unmatched by other alternatives.

PeaceLove Corporate Workshops teach practices that encourage self-care, personal healing and body/mind/spirit wellness. This shift towards supporting the emotional and mental well-being of employees has the potential to increase the quality of interactions between both colleagues and clients, further enhancing the atmosphere of the workplace. By integrating the arts processes, employees gain access to new perspectives and solutions for both professional and personal challenges alike.

The Workshops

All workshops are customizable to meet the specific needs and goals of your employees. Workshop times range from 2 hours to 4 hours and can be for groups as small as 6 or as large as 100+. Costs start at \$150 per person.

Harness the power of creative expression to get everyone "on the same canvas." Participants enter these multi-media art experiences as individuals and come away as a cohesive team filled with creative energy. Guided group activities allow participants to discover the creative process while collaborating and communicating in an unconventional and inspiring way.

"This was a really fun experience. It helped me realize that creativity and artistic ability come in many forms and we just need to be able to open ourselves."

-E. Pensa, Public Relations Manager, CVS Caremark

The Impact

For each workshop booked by your company, PeaceLove will provide a free Paint4Peace™ experience to your choice of organization, supporting a community in need. By sharing PeaceLove expressive arts experience with your employees, you will also make it possible for individuals with less fortunate circumstances to experience PeaceLove and its potentially life-changing benefits.

"The boys and girls were able to smile, laugh and 'just be kids,' if even for a short time. Through the workshops, the children in our care were given hope that they can overcome their struggles and find peace of mind in the simplest of things, like painting."

-April Schrenker, Robert F. Kennedy Children's Action Corps
